

CS1124 1-4 Link Port Expander

Summary

The CS1124 is used to expand the CS548 or CS448 link port to serve up to 4 linked devices. The CS1124 allows the CS548 to read the ID of each linked device, and operate appropriately.

CS1124 Connections

The CS1124 has these Control Side connections:

- Link Port In - Connect this to the CS448 or CS548 Link port using the supplied Mini Din Connector.
- DC Out - connect the supplied DC cable from DC out to the CS548 DC In.
- Pwr Led - Indicates power is on
- DC In - plug the CS548 power supply into this socket.

Note that the normal CS548 power supply is used to power both the CS1124 and the CS548.

The CS1124 has the Link Port side connections:

Up to 4 Link Port controlled products can be plugged into the Link Port Out connections.

The CS1124 supports all Cleverscope Link Port controlled devices.
